File

There has been no formal PRP search for either operable unit for the West Lake Landfill. Initial inquiries lead to negotiations with parties who ultimately entered into an Administrative Order on Consent for Operable Unit 1. Those parties are Cotter Corporation, Rock Road Industries, Laidlaw and the U.S. Department of Energy. The parties have requested consideration of the inclusion of one additional company and that consideration is still underway.

Laidlaw, after EPA initiated investigations into landfill users, stated that it would stand responsible for the RI/FS and cleanup of the general landfill, Operable Unit 2. Laidlaw has entered into an Administrative Order on Consent for the RI/FS. No additional parties are expected to be required to participate in the OU 2 site activities.
